.ro ccTLD Stats

- The RoTLD represents the official authority that administer .ro ccTLD by creating, implementing and maintaining the software systems, databases and all the infrastructure needed for the .ro domain to be present on Internet.
- In 1992, the first LIR (Local Internet Registry) was established at ICI Bucharest with the purpose to allocate Internet resources (IP addresses and ASN numbers) to Romanian institutions, companies and individuals who started to build their own networks. It was the first national research and education network (NREN) named RNC (Reteaua Nationala de Calculatoare).
- In 26 February 1993, IANA (Internet Assigned Numbers Authority) delegated ICI Bucharest to be the operator of .ro ccTLD Registry. This is considered the birthdate of .ro Internet domain.

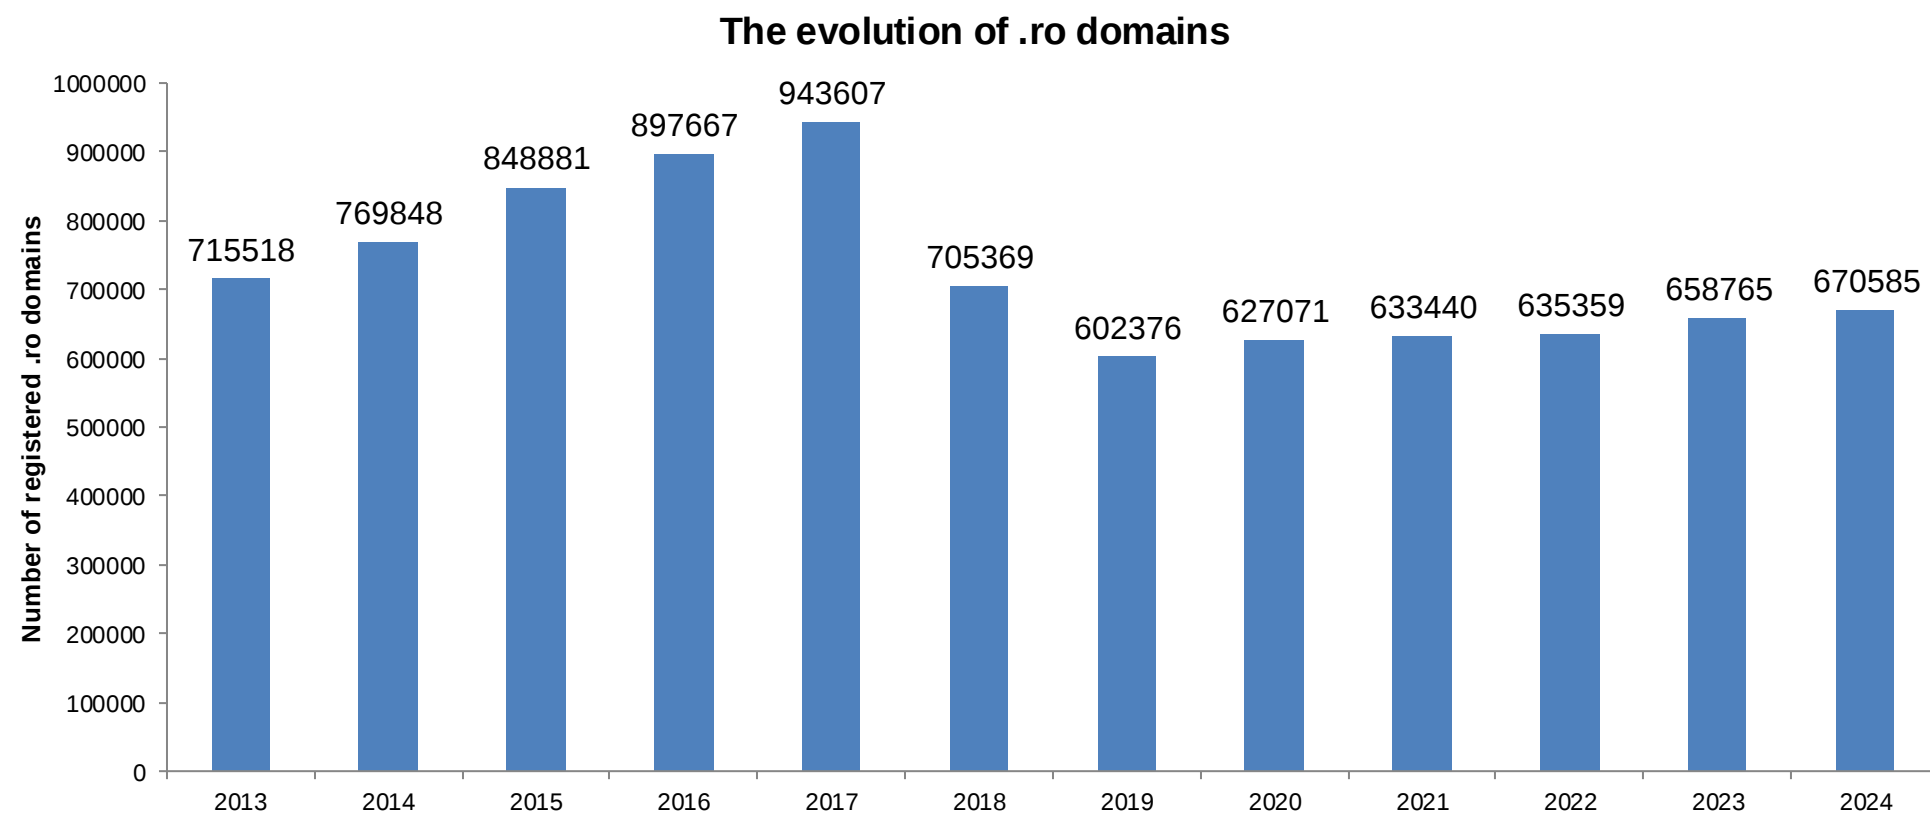

RoTLD Registry – operational model (3R)

- **Registry** - represents the entity responsible for the administration of a top level domain (TLD)
- **Registrar** - the organization that registers domain names with the Registry on behalf of the users (sits between Registry and Registrant)
 - currently 214 accredited Registrars
- **Registrant** - an individual or entity who registers a domain name and become the holder of the domain right of use
 - can register .ro domains directly at Registry or by any RoTLD accredited registrar

.ro ccTLD Registry – key moments after 2010

- **May 2012** – RoTLD enabled IPv6 on it's services
- **February 2013** – New registration and administration software platform launched with REST/EPP API
- **June 2015** – Romanian IDN (Internationalized Domain Names) introduced (ă â î ș ț)
- **June 2016** – .ro DNS zone was DNSSEC signed
- **March 2018** – Transition to Annual Maintenance and Registration fee
